<sup>\*</sup> Please note that the Bank introduced some presentation changes as specified in the note 5 to the Financial Statements. Therefore, 2010 data is not fully comparable.

As at 31 December 2012 the capital adequacy ratio amounted to 13.80% vs. 11.53% at the end of December 2011. This change was brought about by the increase of the Bank's share capital and the Polish Financial Supervision Authority's consent to classify the subordinated loans as additional funds.

On 2 January 2012 the Bank received a written request of the Polish Financial Supervision Authority to supplement and correct the Recovery Programme for BNP Paribas Bank Polska S.A. The Bank submitted the updated Recovery Programme for BNP Paribas Bank Polska S.A. on 3 February 2012. The update provides for:

- prolonging the Recovery Programme until 2014,
- financing credits in PLN in 100% using funds gathered by clients as current and fixed deposits in PLN,
- maintaining the capital adequacy ratio at the level not lower than 12.0%,
- additional payments to capital of the Bank through capital increase in 2012 by issuing new shares.

In addition, following the request of BNP Paribas Group, the Polish Financial Supervision Authority gave its consent to extend the deadline for fulfilling the BNP Paribas commitment to raise its free float up to the level of at least 15% until the end of 2013. BNP Paribas Group plans to increase the free float through a new issue of shares and sale of current shares, which can have a positive impact on the capital position of the Bank in 2013.

In our opinion, the results of the audit of the Group's consolidated financial statements as at 31 December 2012, the analysis of the above presented ratios as well as all the information available to us as at the date of preparing this report and the opinion, do not present any threat to the Group's ability to continue as a going concern over the 12 months from the cut off date.
