1. Introduction

In accordance with the Regulation of the European Parliament and of the Council (EU) No 575/2013 as of 26 June 2013 on prudential requirements for credit institutions and investment firms, amending Regulation (EU) No 648/2012 (Acts. Office. EU. L No. 176, p. 1), hereinafter referred to as "**Regulation (EU) No 575/2013**", Bank BGZ BNP Paribas SA with its registered office in Warsaw, hereinafter referred to as "**Bank**", is obliged to publish in a publicly accessible manner information about the qualitative and quantitative adequacy of the capital excluding irrelevant information, proprietary or confidential. This document provides information on the capital adequacy of the Bank BGZ BNP Paribas SA Capital Group as of 31 December 2016.

Pursuant to the obligation specified in article 13 of the Regulation (EU) No 575/2013, Bank publicly discloses as defined in art. 437, 438, 440, 442, 450, 451 and 453 the information based on data available at the highest, national level of consolidation for prudential purposes.

The obligations arising from art. 450 of the Regulation (EU) No 575/2013 are fulfilled through the publishing on the Bank's website of the "Information on Management Board Remuneration Policy and Remuneration Policy for all employees, which covers employees in managerial positions, having a significant impact on the risk profile of Bank BGŻ BNP Paribas S.A."

2. Information on Bank BGŻ BNP Paribas S.A. Capital Group

The Bank BGŻ BNP Paribas S.A. Capital Group, hereinafter referred to as "Bank Capital Group" is a part of BNP Paribas S.A., an international financial institution based in Paris. The direct parent entity of Bank BGŻ BNP Paribas S.A. is BNP Paribas S.A. which holds 88,33% of the Bank's shares, where 28,35% are held indirectly per BNP Paribas Fortis SA/NV (former Fortis Bank SA/NV) based in Brussels. Rabobank International Holding B.V. holds 6,66% shares. The remaining 5,01% of shares is held by minority shareholders.

* Numbering in accordance with Annex VI of the Implementing Regulation of the Commission (EU) No 1423/2013 as of 20th December 2013 establishing implementing technical standards in disclosure requirements on the institution's own funds in accordance with Regulation of the European Parliament and the Council (EU) No 575/2013 ((Acts. Office. EU. No. L 355, p. 60), hereinafter referred to as **"Implementing Regulation (EU) No 1423/2013**". Indicated in Annex VI of the Commission Implementing Regulation (EU) No 1423/2013 positions which are not included in the table above do not apply to the Bank.

For the purpose of preparing the statement of Core Tier I and Supplementary Tier II capital on a consolidated basis, shares in subsidiaries are switched off. Bank's own funds include:

1) Core capital,

2) Supplementary capital.

Core capital of the Bank includes:

1) core funds which constitute:

- a) share capital,
- b) additional capital,
- c) reserve capital,
- 2) additional items of core capital funds, which include:
 - a) general risk fund for unidentified risk related to banking operations,
 - b) retained earnings,
 - c) other items of the balance sheet specified by the Polish Financial Authority,

d) profit under approval and net profit of the current reporting period, computed pursuant to the binding accounting policies, net of any expected charges and dividends, in amounts not higher than amounts of profit verified by statutory auditors,

- 3) deductions from Core capital which are
 - a) goodwill and other intangible assets,

b) prudential filters; the type of particular filters and deductions applied pursuant to Articles 467-470, 474, 476 and 479 of the Regulation (EU) No 575/2013.

Supplementary capital is created under the resolutions of the General Meeting. The share capital of the Bank as at 31 December 2016 amounted to PLN 84 238 318. Nominal value of each share is PLN 1.00, where:

- 74 409 864 is owned directly or indirectly by BNP Paribas SA,
- 5 613 875 is owned by Rabobank International Holding B.V.,
- 4 214 579 is owned by the other shareholders.

Additional capital is established from net profit deductions in a fiscal year and a surplus obtained at issuing shares above their nominal value, remaining after covering the costs of issuance, from additional capital payments made by shareholders in exchange for assigning special rights to their existing shares without increasing the share capital. Additional capital may be earmarked for the coverage of balance sheet losses.

Reserve capital is established regardless of the additional capital from net profit deductions in a fiscal year, earmarked to cover the balance sheet loss.

The general risk fund for unidentified risk related to banking operations is established from net profit deductions in the amount resolved by the General Meeting. The general risk fund is earmarked for unidentified risk related to banking operations.

Retained earnings are profits generated by the Bank Capital Group in the previous period after deducting the dividends paid. Retained earnings include:

- remaining additional capital,
- reserve capital,
- general risk fund,
- retained earnings of the previous years,
- net financial result attributable to shareholders of the parent entity.

Unrealized gains and losses on available-for-sale debt and capital instruments are recognized in own funds, in line with the instructions included in the Regulation (EU) no. 575/2013 and the Banking Law Act.

Capital instruments and subordinated loans qualify as instruments under Tier II, provided that the conditions specified in Article 63 of the Regulation (EU) No 575/2013 are met. Capital Tier2 include subordinated loans received with a value of PLN 1 765 435k.

Bank introduced deduction for core Tier I capital in accordance with art. 36 (1) point. b. of Regulation (EU) No 575/2013 for intangible assets in amount of PLN -246 373 k. For additional Tier I and supplementary Tier II capital deductions have not been applied.

The Bank has not adjusted capital pursuant to art. 47, 48, 56, 66 and 79 of Regulation (EU) No 575/2013.

The Bank applied prudential filters, referred in art. 32-35 Regulation (EU) No 575/2013 introducing a correction of unrealized gains in own funds in compliance with art. 468 Regulation (EU) No 575/2013 in amount of PLN -467 k.

The Bank uses the transitional arrangements and include adjustments to the amounts of unrealized gains and losses related to assets or liabilities measured at fair value and recognized in the balance sheet, and that during transitional period are subject to the provisions of Article 467(1) and 468 (1) of Regulation (UE) No 575 / 2013.

In the Tier I, AT I and Tier II capital statement - adjustments which had not been provided in Regulation (EU) 575/2013 have not been applied.

With reference to the art.437 of the Regulation (EU) No 575/2013 the Bank discloses main features to Tier I capital.

Tier I capital adequacy ratio	11,06%

According to Art. 438 of Regulation (EU) No 575/2013, the Bank publishes a brief description of the adequacy of its internal capital to support current and future operations. Internal capital estimation methods are currently converging towards BNP Paribas Group framework embodying risk type definitions and policies. Risk definitions used by the Bank are being aligned with the definitions applied by the BNP Paribas Group. However, the risk definitions have been approved by the Supervisory Board of the Bank and they may differ to the latest ones at the BNPP Group level.

The core risk identified in the Bank are described in the following paragraphs.

Liquidity Risk

The risk for the Bank to be unable to fulfill its obligations at an acceptable cost in a given currency and location. The Bank recognises the material impact of liquidity risk on the Bank's activity. The management of liquidity risk is currently converging towards BNP Paribas Group framework and policies.

Credit risk

Credit risk is considered material by the Bank. It results from the volume and nature of the Bank's assets. Credit risk is the risk of incurring an economic loss on loans and receivables, existing or potential due to prior commitments, resulting from the credit quality migration of the Bank's debtors, which may eventually come to default.

The probability of default and the expected recovery on the loan or receivable in the event of default are key components of the credit quality assessment. When measured at portfolio level, credit risk takes into account correlations between the values of the loans and receivables making up the portfolio concerned.

Market risk (interest rate and currency risks) and Interest rate risk in the Banking Book

Market risk is defined as the risk of incurring an economic loss as a result of adverse changes in market parameters, those ones being directly tradable or not. The risk of incurring an economic loss as a result of mismatches in interest rates, maturities or nature between assets and liabilities. For banking activities, asset-liability management risk is

measured in non-trading portfolios and primarily relates to the interest rate risk in the banking book.

Operational risk

Bank defines operational risk in compliance with the Regulation (EU) No 575/2013 as the risk of incurring an economic loss due to inadequate or failed internal processes, human and systems errors or due to external events, including legal risk. The management of operational risk is underpinned by an analysis of the cause - event - effect chain.

The management of operational risk is currently converging towards BNP Paribas Group framework and policies.

Business, reputation, and strategic risks

Business risk is the risk of a negative operating result due to the inability to match costs to revenues. This may be due to changes in the business environment and to the inelastic cost structure that prevents them from being corrected.

5. Capital buffers

Based on Article 19(1) of the Act of 5 August 2015 on Macroprudential Supervision over the Financial System and Crisis Management in the Financial System (Dz. U. of 2015. Pos. 1513 with later. D.), hereinafter referred to as the "**Macroprudential Law**" in connection with the wording of Article 84 of the Macroprudential Law, Bank in the period from 1 January 2016 until 31 December 2017, is obliged to retain the amount of core capital Tier I, ancillary to the core capital Tier I held for the purpose of meeting the requirement of own funds, referred to in Article 92(1) of the Regulation (EU) No 575/2013, amounting to 1.25% of the total risk exposure calculated in accordance with art. 92(3) of the Regulation on the principles of individual and consolidated basis(**conservation buffer**).

Pursuant to Article 21(1) of the Macroprudential Law the Bank shall maintain the Common Equity Tier I capital amount, referred to in Article 92(1) of Regulation (EU) No 575/2013, equal to the total risk exposure amount calculated in accordance with Article 92(3) of the Regulation, multiplied by the weighted average of countercyclical capital buffer rates calculated based on Macroprudential Law (**countercyclical buffer specific for the institution**). The applicable counter-cyclical buffer rate equals 0 as at 31 December 2016.

The Financial Supervision Authority by the decision dated 4 October 2016, pursuant to Article 39(1), in conjunction with Article 38(1) and (2) of the Macroprudential Law identified the Bank as the other systematically important institution and imposed the other systematically important institution buffer on the Bank, equal to 0.25% of the total risk exposure amount calculated as at 31 December 2015, pursuant to Article 92(3) of Regulation (UE) No 575/2013 (**Other systematically important institution buffer**).

The Financial Supervision Authority by the decision dated 18 October 2016 recommended Bank the maintenance of the additional requirement of own funds than the value resulting from the requirements calculated in accordance with the detailed rules set out in Regulations (UE) No 575/2013 in order to hedge risk arising from foreign currency mortgage loans for households at 0.71 pp more than the value of the total capital ratio, as referred to in Article. 92(1)(c) of Regulation (UE) No 575/2013, which should consist of at least 75% of Tier I capital (which corresponds to a capital requirement at the level of 0.53 pp more than the value of Tier I capital ratio, as referred to in Article 92(1)(b) of Regulation (UE) No 575/2013) and at least 56% of the core capital Tier I (which corresponds to a

capital requirement at the level of 0.40 pp more than the value of core capital ratio Tier I, referred to in Article 92(1)(a) of the Regulation (UE) No 575/2013) ("**Individual capital add-on due to foreign currency mortgage loans**").

On 23 December 2016, the Financial Supervision Authority, informed with reference to the decision dated 18 October 2016 imposing on the Bank Individual capital add-on due to foreign currency mortgage loans that the additional capital requirement for the Group of Bank BGŻ BNP Paribas S.A. stood at 0.68 p.p. for the total capital ratio, 0.51 p.p. for Tier1 capital ratio and 0.38% for the common equity Tier1 capital ratio.

The value of foreign credit exposures for the Bank's Group did not exceed the threshold of 2% of total general credit exposures, trading book exposures and securitization exposures specified pursuant to Article 2(5)(b) of Commission Delegated Regulation (EU) No. 1152/2014 of 4 June 2014 supplementing Directive 2013/36/UE of the European Parliament and of the Council with regard to regulatory technical standards on the identification of the geographical location of the relevant credit exposures for calculating institution-specific countercyclical capital buffer rates (Acts. office. EU. series L No. 309 p. 5). These exposures have been assigned to credit exposures in the territory of the Republic of Poland.

Pursuant to Article 83 and Article 96 of the Macroprudential Law, since 1 January 2016 the countercyclical buffer is 0% for credit exposures in the territory of the Republic of Poland.

As a consequence, the countercyclical buffer as of 31 December 2016 was 0 p.p.

Table 8 The geographic distribution of the relevant credit exposures for the countercyclical buffer calculation as of 31 December 2016.

6. Credit risk adjustments

Bank discloses information regarding the institution's exposure to credit risk in the Consolidated Financial Statements of the Capital Group of Bank BGŻ BNP Paribas S.A. for the year ended 31 December 2016 hereinafter referred to as **"Consolidated Financial Statements**" at :

https://www.bgzbnpparibas.pl/ fileserver/item/1509244

The following sections of the Consolidated Financial Statements should be referred to for the credit risk disclosures resulting from the art.442 of the Regulation (EU) No 575/2013:

- 1) Definitions and recognition of impairment, past due, and credit risk adjustments Note 2.16.
- 2) Credit risk management approaches and methods Note 50.2.
- 3) Credit risk adjustments Note 3, 22.
- 4) Maturity breakdown of the exposures Note 50.2.
- 5) Changes in the specific and general credit risk adjustments Note 22.
- Changes to the impairment provisions accounted for categories of receivables Note 22.

The total amount of exposures after accounting offsets and without taking into account the effects of credit risk mitigation, and the broken down by different types of exposure classes are presented in the table below.

Table 9 The total amount of exposures after accounting offsets and credit risk mitigation techniques asof 31 December 2016

7. Use of credit risk mitigation techniques

In terms of art. 453 of the Regulation (EU) No 575/2013 Bank makes use of both on- and off-balance sheet netting. The first credit risk mitigation technique applies to the lines drawn and deposits placed with the BNP Paribas SA. The off-balance sheet netting is in use for derivative transactions which are concluded under master agreements signed with corporate, SME and Micro clients segments. The off-balance netting also applies to derivative transactions concluded with selected credit institutions.

The Bank does not use credit derivatives as the credit risk mitigation technique.

The information about the credit risk concentrations is given in the note 50.2 of the Consolidated Financial Statements.

8. Leverage risk

Table 16 Leverage Ratio

Level of application

The Bank discloses information on its leverage ratio based on Commission Implementing Regulation (EU) 2016/200 of 15 February 2016 laying down implementing technical standards with regards to disclosure of the leverage ratio of institutions according to art. 451 of the Regulation (EU) No 575/2013 (Acts. Office. EU. Series L No. 39, p. 5).

The Calculation of leverage ratio of the Bank Capital Group as of 31 December 2016 was made under the provisions of Commission Delegated Regulation (EU) 2015/62 as of 10 October 2014 amending Regulation (EU) No 575/2013 in respect of the leverage ratio (Acts. Office. EU. Series L No. 309, p. 5), hereinafter referred to as "Delegated Regulation 2015/62.". According to the Delegated Regulation 2015/62 financial leverage ratio is expressed as a percentage of the value of the quotient of Tier I capital and total exposure measure by the end of the reporting period, while total exposure measure is the sum of the exposure values determined under all of the assets and off-balance items not deducted when determining the capital measure Tier I.

Table 20 Description of the processes used to manage the risk of excessive leverage and Description of the factors that had an impact on the leverage Ratio during the period to which the disclosed leverage Ratio refers

1 Description of the processes used to manage	The leverage risk is defined by the Bank in the Bank's Risk Strategy and
the risk of excessive leverage	Internal Capital Adequacy Assessment Process Methodology while
	reporting is described in Instructions for the preparation of the COREP
	report and Leverage Ratio in Bank BGZ BNP Paribas SA.
2 Description of the factors that had an impact	The risk of excessive leverage means the risk of an insufficient leverage
on the leverage Ratio during the period to	ratio due to a decrease in the institution's own funds as a result of expected
which the disclosed leverage Ratio refers	or incurred losses (decrease in numerator) or unexpected and unmanaged
	increase in total exposure (increase in denominator). The value of financial
	leverage depends directly on the economic size of the bank and its capital
	plan. The value of leverage is one of the basic indicators monitored on a
	regular basis. Thanks to this, the Bank has the necessary information to
	avoid breaking the safe level of the leverage. The biggest impact on the
	leverage ratio in 2016 had the legal merger with Sygma Bank S.A. and a
	change in off-balance sheet items are recognision, as reported in the
	COREP report.

9. Operational risk

Strategies and processes in operational risk management

The Bank manages the operational risk based on the approved strategy and policy.

Operational risk is defined by the Bank as the possibility to incur losses or an unjustified cost resulting from inadequate or failed internal processes, people and systems or from external events. Legal risk is included into the operational risk, whereas strategic risk is excluded.

The objective of the operational risk management is to ensure the top quality standards of services rendered by the Bank, to ensure their security and compliance with the binding regulations and the best standards and lowering the losses and costs caused by the operational risk at the same time. Organizational culture in operational risk management plays an important role for the Bank. Key element is employees' awareness about the risk

and their share in the responsibility for its reduction. Operational risk is commonly present in the banking activity, what means that each of the employees and each of the organizational units are responsible for operational risk identification within their scope of responsibilities and taking actions aimed at risk reduction.

Operational risk management system is integrated. It means that all actions and functions concerning operational risk management are combined in one, consistent, transparent, complete and efficient system. In order to avoid a potential conflict of interests and in order to ensure objectivity, operational risk assessment function in the Bank is separated from the function responsible for making business decisions. Operational risk control function is autonomous and placed in Risk Area.

Operational risk management process included the following stages:

- 1) risk identification,
- 2) defining risk causes (sources),
- 3) assessment of the risk amount and setting its acceptable level,
- 4) analysis of possible solutions to reduce the identified risk (risk countermeasures),
- 5) taking a decision to reduce risk,
- 6) taking necessary actions,
- 7) control and assessment of applied risk reduction tools (feedback).

Organization of the operational risk management process

Operational risk management is carried out in an integrated form, within the dedicated operational risk management structure, that is separated both in organizational and functional form. It includes:

- Internal Control Coordination Committee responsible for supervision, coordination of the processes and allocation of tasks and resources within the operational risk management system,
- dedicated unit in the Head Office of the Bank i.e. Operational Risk Department responsible for development, coordination and control of the basic operational risk management processes, as well as development and implementation of tools, procedures and operational risk management rules,
- function of operational risk coordinators in organisational units responsible for coordination and clarification of all questions related to operational risk management in organisational units.

Operational risk management is closely connected to the management of other kinds of risk due to the fact that a substantial part of the operational risk losses occur between operational risk and credit risk or operational risk and financial risk, as well as other banking risks.

Actions directly aimed at operational risk mitigation are taken by units responsible for individual areas exposed to operational risk (first line of responsibility).

Scope and types of risk reporting and measuring systems

One of the operational risk management stages is taking actions aimed at risk reduction. Those actions mean preventing the threat or reducing the consequences of the event as well as carrying out system actions aimed at elimination of causes of the events. Systems actions are e.g. eliminating the gaps in internal regulations and procedures, preparing new or changing the existing tools, introducing changes to work organization, improving control mechanisms and introducing changes to IT systems. Before taking such actions, their costs are analysed as well as potential losses that can be borne without implementing the suggested solution.

For the operational risk monitoring and assessment the Bank applies among others: selfassessment method, Key Risk Indicators (KRI) as well as the data about identified operational risk events and threats, incl. operational risk losses – using the internal and external data. The Bank decides on its risk tolerance (operational risk appetite) and takes appropriate actions when the accepted risk level is exceeded.

The Bank's Management is regularly informed about the level of operational risk as well as about actions taken due to identified operational risk events and threats.

The Bank applies insurance cover within the framework of risk transfer.

The gross losses resulting from the operational risk events reported in 2016 have been presented in the table below by event types and categories. The amount of gross loss means a sum of losses resulting from the operational risk incidents registered in the Bank's internal database, both realized and not realized (in the Bank's opinion possible to be realized) without taking into account reductions resulting from amounts recovered from the insurance. Data includes the operational risk losses connected to the credit risk and financial risk.

	[k. PLN]
Internal frauds	1 830
Unauthorised activity	290

Customer account management	24
Trade counterparties	5
Monitoring and reporting	96
Vendors & suppliers	30
Total	29 964

Table 21 Gross losses resulting from operational risk events reported in 2016 (in k. PLN)

In order to mitigate risk the Bank strengthens processes and mechanisms aimed at limiting level of risk. This includes amongst others prevention of frauds to the Bank's detriment (especially in the loan area where the largest operational risk losses were reported) and control of correctness of execution of processes in which the irregularities are identified (especially by developing IT system functionalities). Moreover, the Bank regularly verifies and assesses the internal control environment as well as determines actions improving the control mechanisms efficiency.
