THE FUTURE OF BUSINESS
IS MOBILE

GOmobile Biznes
MOBILE AUTHORIZATION

Mobile authorization is a new method for logging in and transaction authorization. Thanks to a mobile token embedded in the **GOmobile Biznes** application, you may authorize instructions placed in the BiznesPl@net online banking system easily and free of charge. The new authorization method ensures high level of security and convenience, and instructions may be signed not only with the PIN but also using biometrics.

Change of the logging in and transaction authorization method for **mobile authorization** requires granting **GOmobile Biznes and mobile token** and **Changing the logging and transaction authorization method** rights. Rights may be granted in two ways:
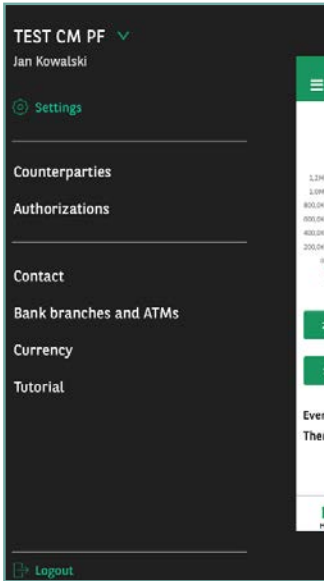

- by the system Admin in the Administrator panel,
- in a paper application for BiznesPl@net.

Activation of a mobile token

Step 1. Launch the GOmobile Biznes, application, then click the drop-down menu icon in the top left-hand corner. Go to "Settings" and select the "Mobile token" option.
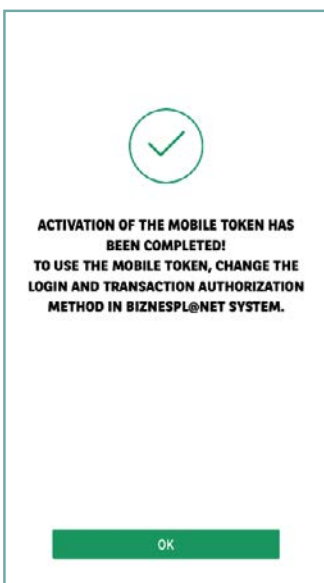

Step 2. Enable the mobile token and click "Apply".

A primary way for mobile authorization is the PIN number defined beforehand for logging in to the **GOmobile Biznes** application.

The application also allows to set a separate PIN code for mobile authorization - to do this, activate an appropriate option and set the PIN number.

Using biometrics for mobile authorization is enabled as default.

Krok 3. After the PIN has been entered, the mobile token will be activated.

Changing the login and authorization method to mobile authorization

Once the mobile token has been activated, it is necessary to change the logging in and transaction authorization method in **BiznesPl@net**. For this purpose:

1. Log into **BiznesPl@net**, go to **go to**, and select **Changing the login and authorization method**.
2. Select the option **masked password and mobile authorization** from the drop-down list.

3. Click **Save** and sign the instruction in accordance with the authorization method currently used.

New authorization method will be activated after the next logging in to **BiznesPl@net**.
