THE FUTURE OF BUSINESS IS MOBILE

GOmobile Biznes

Thanks to the **GOmobile Biznes** application you have access to information about your company's accounts balance anywhere. The GOmobile Biznes application has been designed for phones with Android from 6.0 and iOS from 11.

✓ The ability to manage funds on the accounts **7 days a week, 24 hours a day** from anywhere in the world

✓ **Safe access** to your company's finances.

✓ **Convenience** and **simplicity** – in activation and everyday use.

To use the application, the **GOmobile Biznes and mobile token** right is required. The right may be granted in two ways:

– in a paper application for GOonline Biznes,

– by a user having administrator rights in the GOonline Biznes system.

Features

Functionalities of the GOmobile Biznes application

TRANSFERS

As part of this function, you can perform all types of domestic and foreign transfers.

BIOMETRICS

Logging in to the application using a fingerprint and face recognition.

APPROVALS

It provides the ability to manage transfers or batches of transfers in the area of signing and sending them.

MOBILE AUTHORIZATION

You can quickly and safely sign operations in the GOonline Biznes system by using the mobile token, which is a part of the application.

ACCOUNTS

Available options include account list view, account balances, account details and account history. An advanced search and filtering system makes it easy to find accounts and transactions.

BNP PARIBAS

Settings

Using this view, the user can check and modify some application settings.
To help the user find functions, the list is divided into sections:
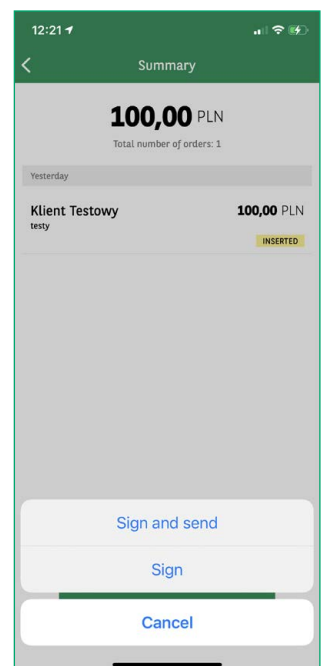

Authorization
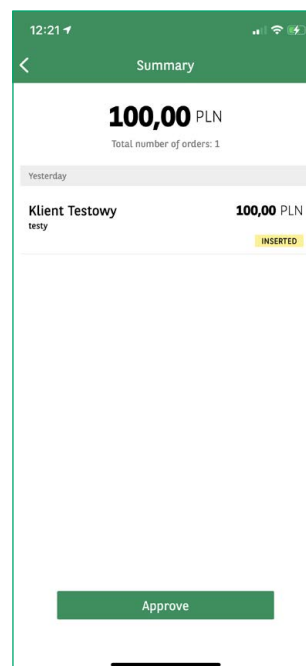

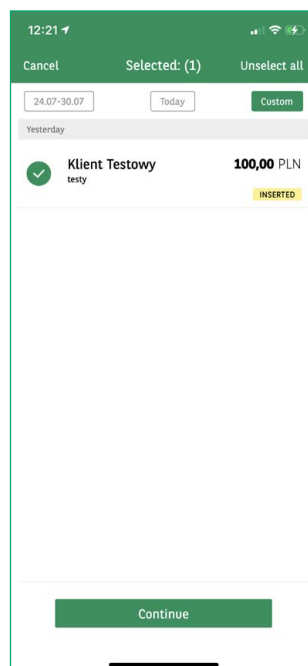

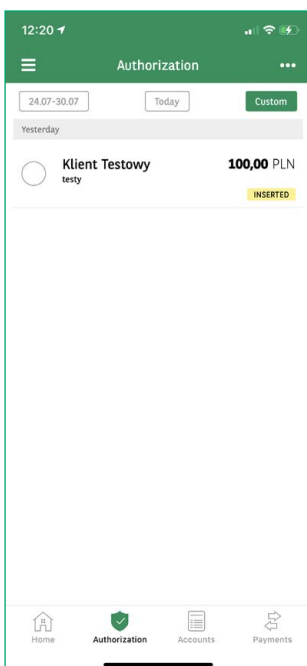

Device

Application

In each section, the system displays a set of available functions, e.g.:

- the ability to change the PIN code,
- changing Touch ID settings,
- changing of the language version e.t.c.

Authorization

On a screen one can see transfers with the following statuses: signed, entered and under approval.
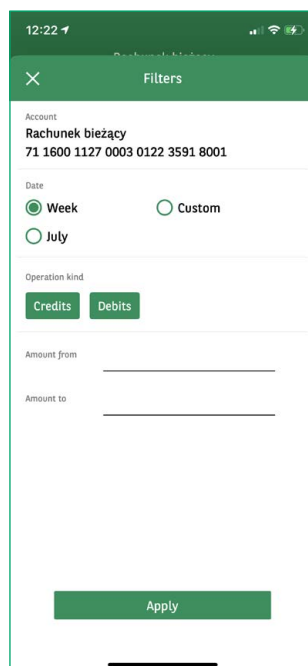

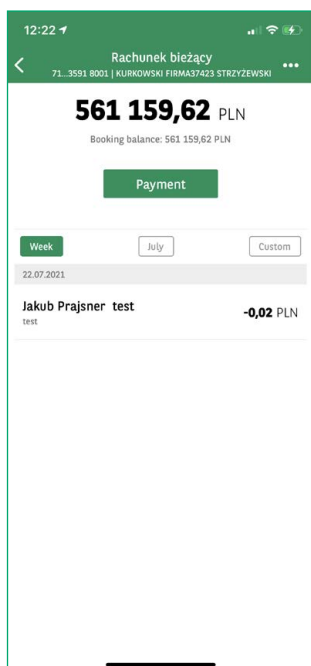

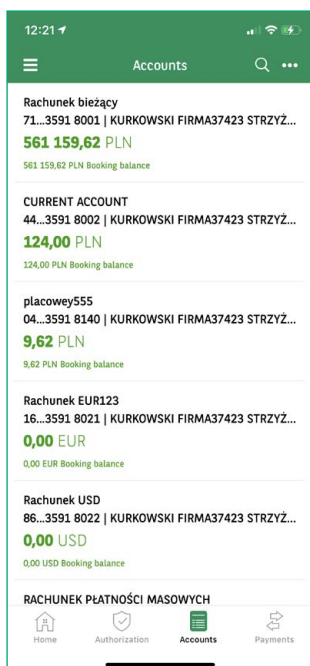

The user can use filters to find orders using detailed data, by clicking on the icon in the upper right corner of the screen. The user can filter the **List of orders** according to the following options:

- Company
- Order kind
- Status
- Signature (signed by me)
- Date
- Account
- Amount range

Accounts

From this tab, the user can check the balance of his funds and the history of operations on the accounts held. The view contains basic information about the account, such as its number, name and balance preview. Additionally, you can generate a transfer confirmation in the application.

The user can use the search tools, e.g. „by account name" and from advanced filters.

Filters allow you to find operations using detailed data. The user can filter the account history according to the following options:
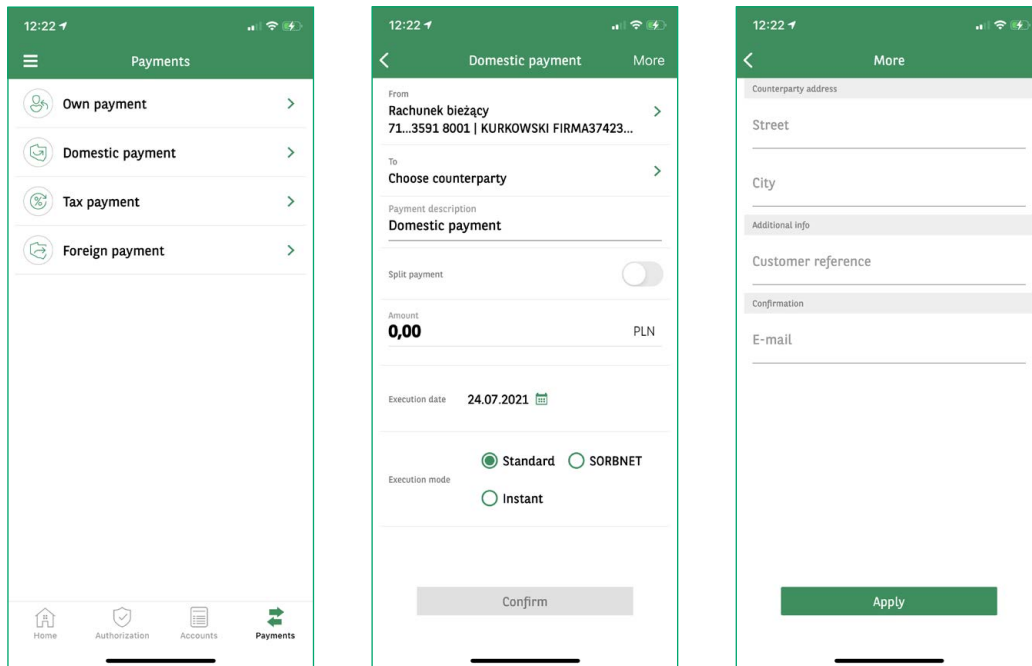

- Company
- Accounts
- Order kind
- Amount range

BNP PARIBAS

Payments

After selecting the **Transfers** tab, a list of available payment types is displayed.
The same approval schemes apply in the GOmobile Biznes application as in the GOmobile Biznes system.

After pressing the **More** button in the upper right corner of the screen, it is possible to enter additional information, such as the contractor's address, references or e-mail address, to which the confirmation of the transfer is to be sent.

Smartwatches

The app is available for Apple Watch and Android Wear

EXCHANGE RATES

Presentation of bank currency buying and selling rates that were selected in the application settings.

BALANCE INDICATOR

The percentage ratio of the account balances allows you to quickly check your company's finances. In the application settings, you must define the amount of 100% of the balance.

ORDERS AWAITING FOR AUTHORIZATION

The screen displays the number of orders waiting for authorization.

BNP PARIBAS

Security

Using the GOmobile Biznes application is secured in accordance with the highest standards

01 ▶ **Encrypted connection** to the banking system (TLS 1.2)

02 ▶ **Individual PIN** for mobile banking

03 ▶ **Automatic logout** of the application after a period of inactivity

04 ▶ **Limiting the number of attempts to authenticate** / authorize operations.

05 ▶ **No sensitive information** is saved **in the phone's memory**.

06 ▶ **The ability to deactivate** the application on the phone

07 ▶ **The application can be blocked** in the GOonline Biznes system.

Mobile authorization

Thanks to a **mobile token** which is a part of the GOmobile Biznes application, you may authorize orders placed in the GOonline Biznes system easily and free of charge.

Mobile authorization ensures **high level of security** and **convenience**, and instructions may be signed not only with the PIN code, but also using **biometrics**.

✓ **SECURITY** Connection to the banking system via an encrypted protocol provides a higher security standard than other authorization methods.

✓ **ACCESSIBILITY** All you need to authorize orders is Internet access. A connection to a mobile operator is not required.

✓ **MODERNITY** Authorization using biometrics.

✓ **CONVENIENCE** The number of mobile tokens is not limited in any way – you can have several devices with an active mobile token.

✓ **CLARITY** Authorizing orders with a mobile token allows to present all the details of the signed order.

BNP PARIBAS

Mobile authorization activation

Mobile token activation

01   **Launch the GOmobile Biznes application**, then click the drop-down menu icon in the top left corner. Go to **Settings** and select the **Mobile token** option.

02   **Enable** the mobile token and click **Apply**.

03   **After the PIN has been entered**, the mobile token will be activated.

Changing the login and authorization method

Once the mobile token has been activated, it is necessary to change the logging in and transaction authorization method in the GOonline Biznes system.

Changing the logging and authorization method to mobile authorization requires granting **Changing the logging and transaction authorization method right**.

01   **Log into** GOonline Biznes, go to **Administration & tools**, and select **Changing the login and authorization method** tab.

02   Select **masked password and mobile authorization** from the drop-down list.

03   Click **Save** and sign the instruction in accordance with the authorization method currently used.

04   **New authorization method** will be activated **after the next logging** in to the GOonline Biznes.

? FAQ

01 ▶ **Does the use of the GOmobile Biznes application and mobile authorization require additional privilages?**

Yes, the use of the application and mobile authorization requires the **GOmobile Biznes and mobile token** right.

02 ▶ **Why does GOmobile Biznes not show all the companies, to which the user has access?**

If the user has access to several companies, the **GOmobile Biznes and mobile token** right must be granted on each of them. Otherwise, the given company will not be visible in the application.

03 ▶ **Why am I not receiving an SMS with the code needed to activate the application?**

The SMS with the activation code is generated only after adding a new device in the GOmobile Biznes system. To do this, go to the **Administration and tools** > **GOmobile Biznes / mobile token** tab and click the **Add new device** button.

04 ▶ **Can one user use the application on several mobile devices?**

Yes, the user can use the GOmobile Biznes mobile application on several devices.

05 ▶ **Can several users use the application on one mobile device?**

No, for each mobile device **you can download and activate only one GOmobile Biznes application**, which can be used by one user.

06 ▶ **In what cases may the user have a problem with downloading and installing the GOmobile Biznes application?**

The users may have problems downloading and installing the GOmobile Biznes application if the security has been compromised (root / jailbreak) or if the device is considered dangerous (root, modifications not allowed by the manufacturers).

07 ▶ **What to do when I forgot the PIN code for the application?**

In this case, the user must go through the GOmobile Biznes application activation process again.
