iShares Dow Jones China Offshore 50 UCITS ETF (DE)

Exchange Traded Fund (ETF)

WKN: A0F5UE ISIN: DE000A0F5UE8

Management Company: BlackRock Asset Management Deutschland AG

Objectives and Investment Policy

- ▶ iShares Dow Jones China Offshore 50 UCITS ETF (DE) (hereinafter the "Fund") is an exchange traded fund (ETF) that aims to track the performance of the Dow Jones China Offshore 50SM (Price Index) as closely as possible. In this regard, it aims to replicate the benchmark.
- ▶ The index measures the performance of 50 of the largest stocks of companies whose primary operations are in mainland China but trade on exchanges in Hong Kong or the USA and are a subset of the Dow Jones China Index. The Index is reviewed semiannually and rebalances quarterly with components weighted by free float market capitalisation and capped at 10%. Free float market capitalisation is the market value of a company's readily available outstanding shares.
- ▶ The Fund mostly invests in equities in order to achieve the investment objective.
- ▶ The proportion of assets in the Fund which matches the weighting of the underlying index (duplication percentage) is at least 95% of the Fund's assets.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ It is not the Investment Manager's intention to leverage the Fund. However, the Fund may generate minimal amounts of leverage from time to time, for example, if using financial derivative instruments (FDIs) for efficient portfolio management purposes.
- ▶ Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 7 years. Investment in the Fund is suitable for investors who have already gained experience with financial markets.
- ▶ The units in the Fund are distributing units. Income from the Fund's investments will be paid out at least once a year as a dividend.
- ▶ The Fund units are denominated in US Dollar.
- ▶ The units are listed on one or more Stock Exchange(s). Investors can buy or sell their units daily during business hours through an intermediary on such Stock Exchange(s).

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated seven due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

For more information on risks, please see the Fund's prospectus in paragraph 'Risk Warnings', which is available at www.ishares.com (select your country and navigate to Documents/Legal information).

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

* Investors dealing on exchanges will pay fees charged by their stock brokers. Such charges are publicly available on the exchanges on which the units are listed and traded, or can be obtained from stock brokers. If investors deal in units directly with the Fund or the Management Company of the Fund, the entry charge is up to 2% and the exit charge is up to 1%.

* Authorised participants dealing directly with the Fund or the Management Company (as the case may be) will pay related transaction costs.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2013. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Management Company undertakes securities lending to reduce costs, the Fund will receive 100% of the associated revenue generated from which up to 40% will be paid to the Management Company in the form of an overall fixed fee in respect of costs arising in connection with the preparation and execution of such security-lending

transactions. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

For more information on charges, please see the Fund's prospectus in paragraph 'Charges' of the Special Conditions of the Fund, which is available at www.ishares.com (select your country and navigate to Documents/Legal Information).

One-off charges taken before or after you invest
