

MANUAL

DISCOVER THE STATEMENTS MENU

In the **Accounts** module, new items are available: **Bank statements** and **Generated statements**.

Statements – VIEW

In the **Accounts list**, the **Last statement/Statement date** column displays information about the last available statement number and its date. After clicking on the statement number, the system will display the indicated account statement.

Accounts list					
All Current Auxiliary Foreign Currency (FC) VAT Saving MBR					
Search		Account	Account type	Currency	Show more
Account name	Account number	Last statement	Book balance	Available balance	
		Statement date			
<input type="checkbox"/>	Główny rachunek podstawowy ZZ 71 1600 1127 0000 0000 0001	003/2023/BPL 05.01.2023	142,04 PLN	142,04 PLN	⋮

The  icon next to the **Last statement** header appears when statements for the previous business day are in preparation.

By clicking on the row with the account number, you can access the **Transaction history** with the filter set to **for the last 7 days**, with the possibility of presenting the **Balance after the transaction**.

 Download  Print

Section: bank statements

In the **Bank statements** section, only daily statements are available for the days on which transactions were performed.

By ticking the check box next to a given statement, it is possible to download statements collectively, and from the list, go to the details of a specific statement.

Generated statements: list

Here you can see the available list of pdf statements for download. This is a list which contains a specification of reports with statements prepared by any company user or by the bank – automatically.

Generated statements: Generate statements

From the **Statement Generator** item, it is possible to generate daily or monthly statements for a given period.

Statement generator

Statement type*
 Daily Monthly

Statement date*

File format*
 PDF MT940

Balance after transaction shown on statement
 Generate file despite no transaction

Arrangement of statements in a file* ⓘ
 Continuous: one below another On separate pages

How to generate a statement?

1. Select the account from which you want to generate a statement.
2. Select the type and date of the statement.
3. Select the format and arrangement of the statements in the file. Also decide whether you want the balance after the transaction to appear on the statement. If you choose the MT940 format, decide on the statement template and the code page.
4. Click "Generate".

The generated statements file can be found in the **Generated statements** list.

Generated statements: Automatic statement generation settings

In this option, you can set up the cyclical and automatic generation of daily, weekly or monthly statements in **PDF** and **MT940** format.

Balance after transaction shown on statement
 Generate the file without transaction

Arrangement of statements in a file* ⓘ
 Continuous: one below another On separate pages

How to create automatic statement generation settings?

1. Enter the name of a setting and then select the account and define the statement generation cycle.
2. Choose the format and arrangement of statements in the file. Tick whether the file should contain balances after transactions and whether the system should generate statements without transactions.
3. If you tick the MT940 format, select a statement template.
4. Click "Confirm".
5. After the setting has been validated, the system will generate files according to the cycle selected.
