The bank
for a changing
world

After the application has been downloaded and installed, it needs to be activated in online banking.

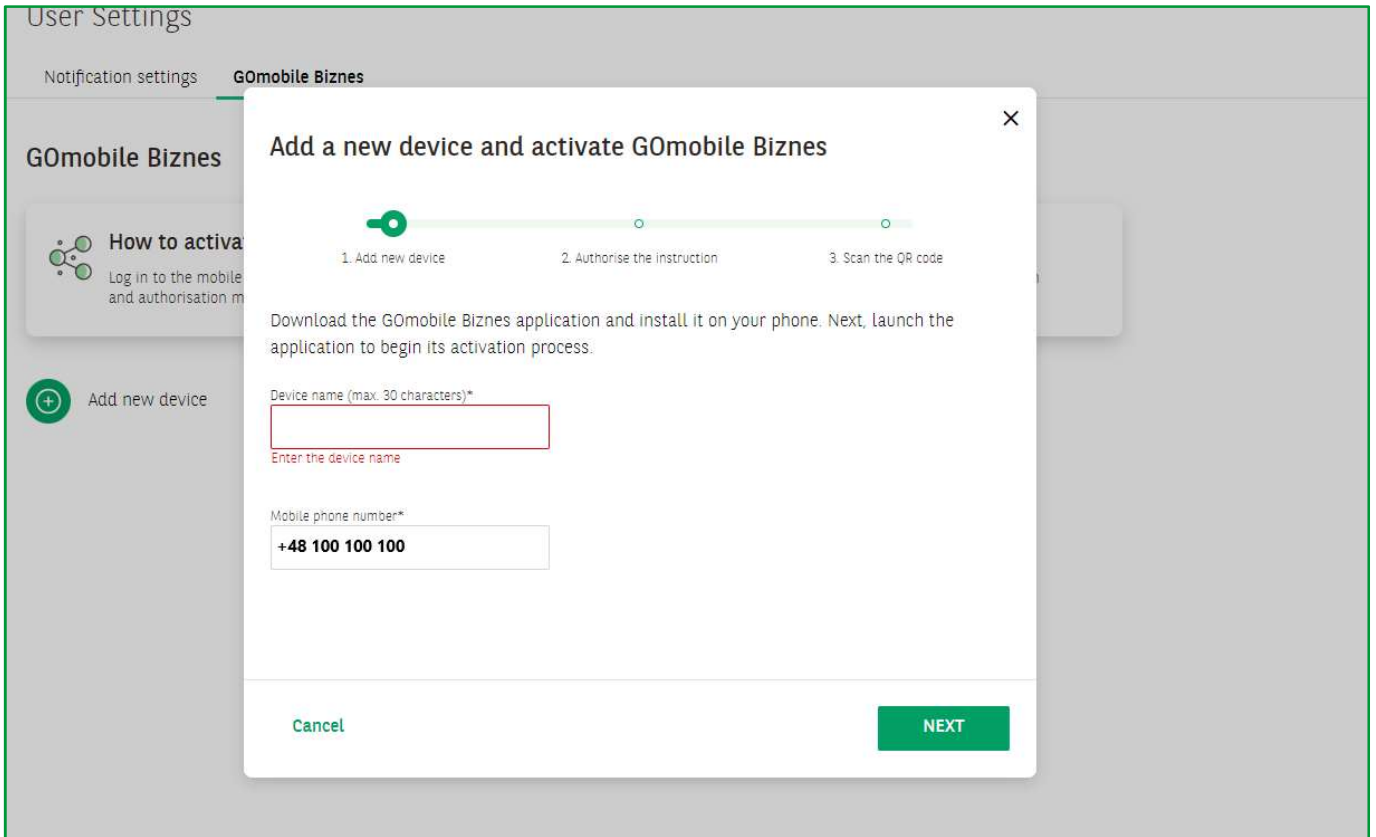

1. Log in to the **GOonline Biznes** system, select the drop-down button next to your company name and your First and Last Name in the top menu, and then go to **User Settings**.

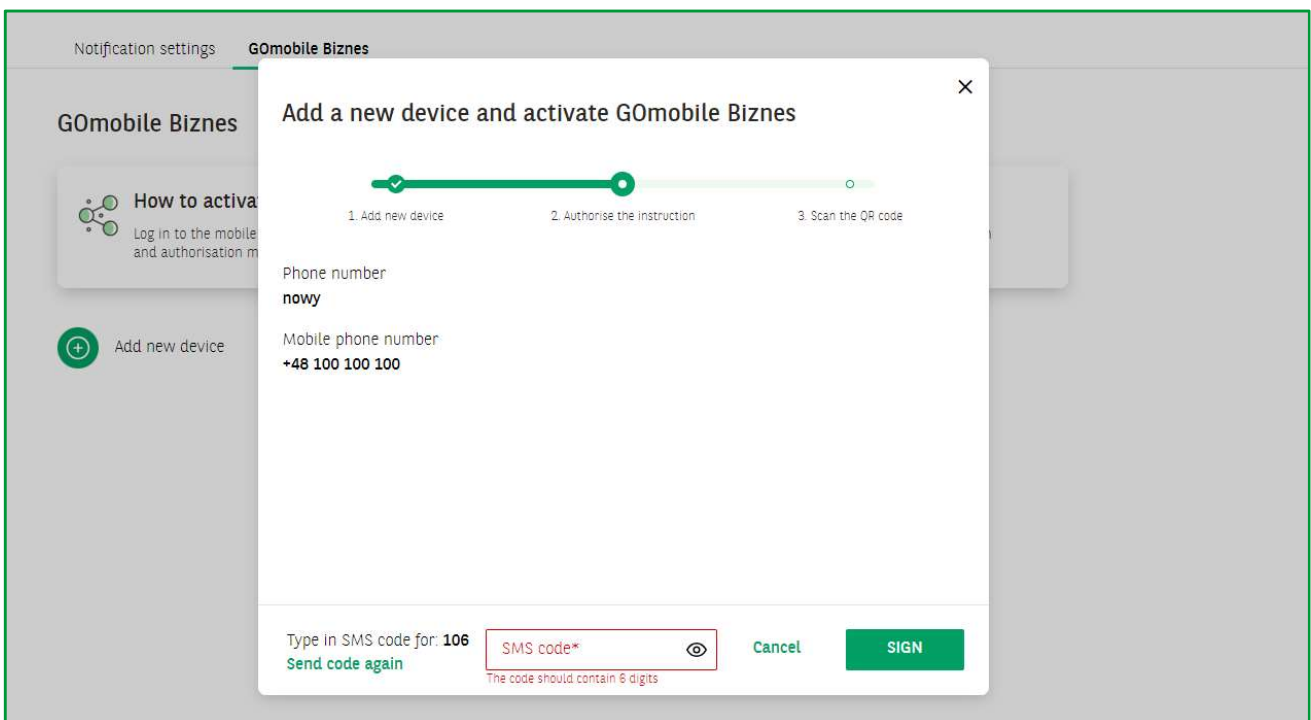

2. Go to the **GOmobile Biznes** tab and click the **Add new device** button.

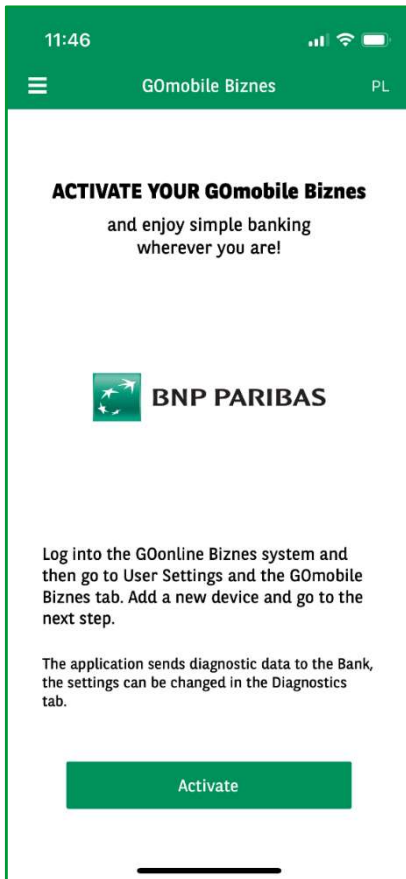

3. Enter the device name and mobile phone number (if not already provided by us) and click **Next**.

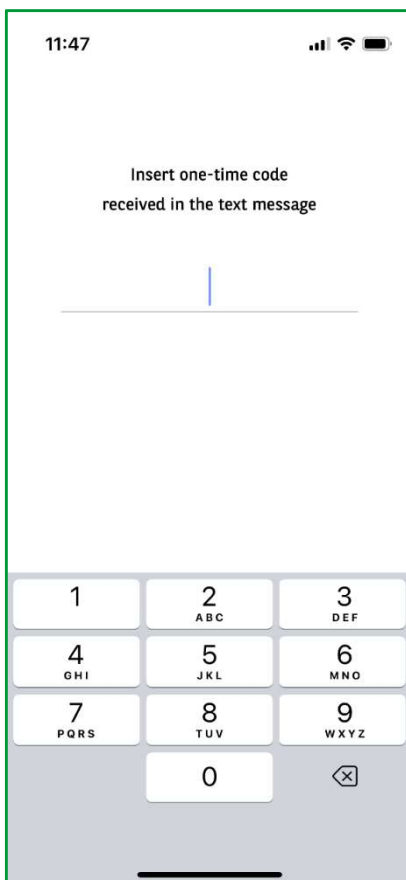

4. Sign the instruction using the currently used authorization method and click the **Sign** button.

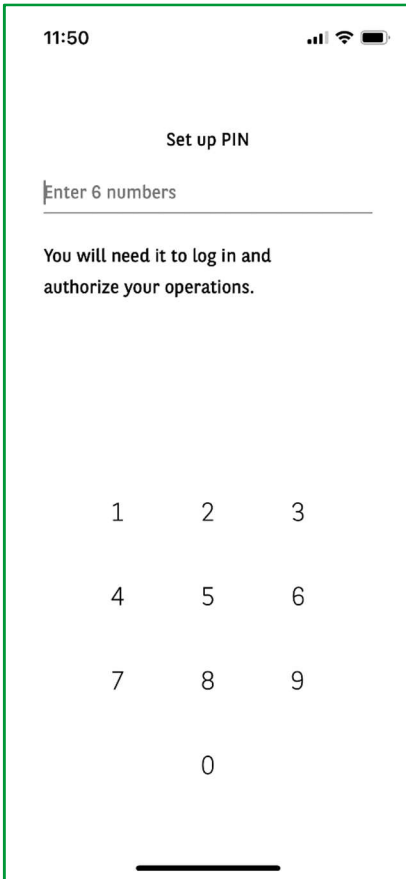

5. Launch the **GOMobile Biznes**, click **Activate** and give the required permission for making phone connections and managing them.

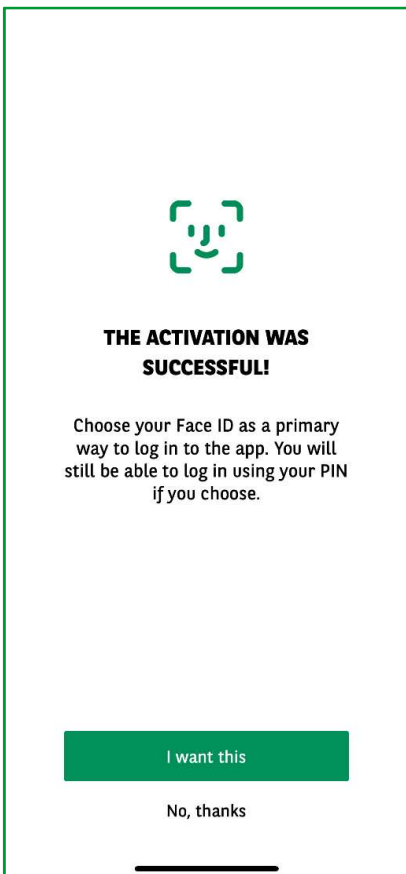

6. Enter the **one time text message code** and allow the **GOMobile Biznes** application to take photos and record films.

7. Scan the **QR code** displayed in the GOnline Biznes system. You may also type the code manually by using the function **Enter the code manually**.

8. Set the **PIN code** necessary for logging in and transaction authorization.

9. If you wish, you may also enable logging in with the use of **biometric** data:

- using **Touch ID / Face ID** for devices with the iOS system,
- using **fingerprint** for devices with the Android system.

ACTIVATION OF A MOBILE TOKEN

Mobile authorization is a new method for logging in and transaction authorization. Thanks to a **mobile token** which is a part of the **GOmobile Biznes** application, you may authorize instructions placed in the **GOonline Biznes** online banking system easily and free of charge. The new authorization method ensures high level of security and convenience, and instructions may be signed not only with the PIN but also using biometrics.

1. If you want to activate the **mobile token**, click **I want this**.

2. Click **Apply** to enable the mobile token

- A primary way for mobile authorization is the PIN number defined beforehand for logging in to the **GOmobile Biznes** application.
- The application also allows to set a separate PIN code for mobile authorization- to do this, activate an appropriate option and set the PIN number.
- Using biometrics for mobile authorization is enabled as default.

CHANGING THE LOGIN AND AUTHORIZATION METHOD TO MOBILE AUTHORIZATION

Once the **mobile token** has been activated, it is necessary to change the logging in and transaction authorization method in **GOonline Biznes**.

Changing the logging and authorization method to mobile authorization requires granting **Changing the logging and transaction authorization method** right.

The authorization may be granted in two ways:

- by the system Admin in the Administrator panel,
- in a paper application for **GOonline Biznes**.

1. Log into **GOonline Biznes**, go to **Administration & tools** and select **Changing the login and authorization method tab**.

2. Select **masked password and mobile authorization** from the drop-down list.

New authorization method will be activated after the next logging in to **GOonline Biznes**.

The screenshot shows the BNP Paribas GOonline Biznes administrator interface. At the top, there is a navigation bar with links for News, Contact, Settings, Currency exchange rates, System security, Questions and answers, and Polski. Below this is the BNP Paribas logo and the tagline 'Bank zmieniającego się świata'. The main navigation bar includes Accounts, Cards, Loans, Transfers, Trade finance, Templates & Contractors, FX Pl@net, Bookkeeping, Administration & tools (selected), Others, Leasing, and Factoring. The user profile for 'Jan Nowak' is visible, along with a 'Log out' button and a dropdown menu for '235918 - FIRMA ABC'. The main content area is titled 'Change of the logging and transaction authorization method' and shows the company name 'FIRMA ABC'. The current method is 'masked password and SMS codes'. A dropdown menu is open, showing the following options: 'masked password and mobile token' (highlighted), 'masked password and vasco token', and 'electronic signature (USB cryptographic device or smart card)'. The left sidebar contains a 'New version of the system' button and a menu for 'Administration & tools' with the following items: Managing users, My rights, Acceptance patterns, Available files, Keys management, Card / USB cryptographic device management, GOMobile Biznes / Mobile token, Password change, Change of the logging and transaction authorization method (highlighted), Managing GOconnect Biznes Customers, and Managing authorization certificates.

3. Click **Save** and sign the instruction in accordance with the authorization method currently used.
